Ceiling Cooling

Floor Heating

"Turbo" Cooling

Press "Turbo" button on remote controller to enjoy a larger air flow, which enables the indoor temperature to reach the set temp in a shorter time.

4-way Air Outlet

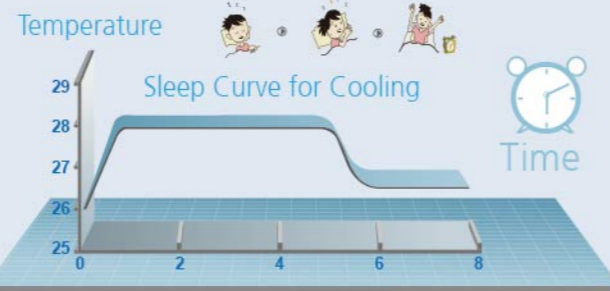

The louver can be vertically or horizontally adjusted so as to maximize comfort in the room.

7 Fan Speeds

From super low to turbo, choose desired air flow.

3 Sleep Curves

3 Sleep Curves

- Mode 1: Indoor temperature automatically rises (when cooling) or drops (when heating).
- Mode 2: Featuring unique refreshment function, the temperature is automatically adjusted to be a little lower before you wake up.
- Mode 3: You could design your own sleep curve under DIY mode.

Low Noise

Noise lowers to 21dB, making you feel like staying on the Moon.

Intelligent Defrosting

Maximize warm comfort with shorter defrosting time. Traditional defrosting works by setting time. E.g. defrosting process is on for 10 mins for every 50mins. Gree I-Defrosting is only performed when needed, which reduces energy waste by eliminating the unnecessary defrosting process.

Functions for Low Ambient Temperature

8°C Heating

Maintain the room temperature steadily at 8°C and prevent the room from freezing by heating operation when nobody is at home for long in severe winter.

-15°C Cooling

Cooling at -15°C while keep a reliable operation. As the outdoor temperature changes, the frequency of compressor and the speed of fan adjusts accordingly.

-20°C Heating

Operate finely when heating at -20°C. It is supported by GREE's electrical heating chassis, preheating technology and frequency-adjusting compressor.

Cold Air Prevention

The copper pipe will be heated in advance, so the air will not be blown out before it reaches the set temperature.

I Feel

The mini sensor in the remote controller can sense its surrounding temperature, and transmit the signal back to the indoor unit. So the unit can adjust the air flow volume and temperature accordingly so as to provide maximum comfort.

Remoter with I Feel

Remoter without I Feel

- FAN**
Choose fan speed
- MODE**
Change operation mode: Auto, Cool, Dry, Fan, and Heat
- Decrease set temperature; hold the button for 2 seconds to decrease set temperature rapidly.
- +**
Raise set temperature; hold the button for 2 seconds to raise set temperature rapidly.
- TURBO**
For rapid cooling or heating
- Horizontal Swing Icon**
Press this button to set horizontal swing angle
- Vertical Swing Icon**
Set vertical swing angle
- CLOCK**
Set present time or display timer
- TIMER OFF**
For turning off timer
- TEMP**
Show set indoor/outdoor temperature
- Ventilation Icon**
Start the ventilation system or generate cold plasma
- IFEEL**
Operation of the unit will be adjusted according to temperature sensed by remoter to maximize your comfort.
- SLEEP**
Air conditioner will run according to the preset sleep temperature curve
- QUIET**
Choose auto quiet mode.
- LIGHT**
Turn on/off the light on the unit
- X-FAN**
Start/stop indoor fan which is used for drying the components

Photocatalytic Filter

This filter is able to completely oxidize and degrade organic contaminants. It can effectively eliminate 99.9% of bacteria, viruses and unpleasant smell.

Active Carbon Filter

Activated carbon can effectively adsorb smoke, pet odors, and other unpleasant odors.

Catechin Filter

Catechin is extracted from green tea. It can effectively eliminate 95% of carcinogenic agents, such as staphylococcus, streptococcus, salmonella, etc.

Silver Ion Filter

Silver ion is able to sterilize 99% of bacteria by suppressing proliferation of mold and bacteria and preventing the causes of unpleasant odors.

Multi-function Filter

Combine 3 filters from 6 different types including acar bacterium filter, silver ion filter, catechin filter, chitin filter, formaldehyde beater filter and vitamin C filter to meet your various needs simultaneously.

Auto Clean (X-FAN)

Cross fan continues blowing to dry inside of indoor unit after switching off the unit so as to keep clean and healthy.

Cold Plasma

Effective sterilization with more than 90% of bacteria killed
Odor removal
Air nutrition improvement with more negative oxygen ions

Electrostatic Dedusting Generator

By making use of the principle of electrostatic adherence, it can effectively absorb the dust from the air. With detachable design, it is easy for complete cleaning to ensure the quality air.

* Notes: Applicable to some selected models

INVERTER

How Inverter Saves Energy

Faster Cooling

Precise Temp Control

50% Energy Saving

Eco-friendly Refrigerant

G¹⁰ Inverter

Ultra low frequency torque control

- Constant temperature
- Energy saving

High-speed DSP chip

- Accurate calculation
- Efficient operation

Wide frequency precise control

- Unceasing operation
- Accurate control

Power factor correction technology

- High efficiency
- Better protection

Environment-friendly R410A refrigerant

- Low-carbon design
- High efficiency

Ultra-low noise control

- Quiet
- Comfortable

Computer simulation control

- Less fluctuation
- Lower noise

Automatic voltage adaptation(150-260V)

- More stability
- Less damage

High reliability

- Excellent quality
- Superior performance

UHF flux-weakening control

- Rapid cooling
- Rapid heating

Key Points for Reaching High Efficiency

Refrigeration System

High efficiency and stable running compressor

High efficiency and larger heat exchanger with optimized piping system

High-efficiency electronic expansion valve (EEV) controls refrigerant flow precisely

Air Flow System

Enlarged air intake and outlet

Optimized cross fan design with larger air volume and enhanced heat exchange efficiency

Optimized axial fan design with larger diameter to increase air volume and enhance heat exchange efficiency

Control System

Cutting-edge chip for precise inverter control

Integrated Evaporator

Compact design minimizes IDU size but enhances heat exchange greatly.

Integrated Design

Integrated rear base and water tray design avoid water leakage and reduce noise.

Dual Side Installation

Left or right side water outlet, easy for installation

Auto Restart

When the power is off and then on, the unit automatically restores the previous function setting.

Fire-proof electric box

Electric box sealed by metal casing could prevent fire in case of short-circuit.

170V Low Voltage Start Up

The unit could operate from 170V to 265V, which is suitable for unstable power supply areas.

Self-diagnosis

The unit shows error code automatically to facilitate maintenance when it does not work well.

Better PCB protection between 85V-265V.

2-Stage compressor

VS

Traditional Compressor

Easy Handle

The ODU is equipped with a handle for easier transportation and protection of wiring terminal and valves.

High efficient and Quiet Fan

Gree's transparent axial fan is resistant to high temperature and operates quietly.

Improved Base Pan Design

Condensing water will flow easily and not be frozen on the base pan. It also improves heating efficiency during low temp operation.

High Temp Resistance PCB

In the inverter outdoor unit, the PCB could work well even when temp is up to 85°C, and also metal casing is fire-proof.

Plastic Casing ODU Anti-corrosion ODU

Rust-free for installation and operation in the salty climate.

Golden/Blue Fin

It can improve the heating efficiency by accelerating the defrosting process, and also be resistant to the salty air, rain and other corrosive elements.

Lomo Series

0.5w Standby • Innovative switcher power design ensures only 0.5w standby and wider voltage of PCB between 85v-265v.

Intelligent Auto Restart • Upon power is resumed after power failure, the units in the whole building will not be restarted at the same time to avoid impact of electricity net (suitable for engineering project).

- Auto Closed-air Outlet**
 - When off, the sliding door rises, preventing dust coming effectively;
 - When on, the sliding door drops, bringing fresh air immediately.
- 3D Airflow**
 - Circulating airflow reaches every corner of your room
- Large LED Display**
 - Perfectly integrated with touch button, it makes an elegant appearance.
 - Real-time humidity display

Diamond Series

High Loading Quantity

Nearly 1600 sets per 40'HQ saves more space and shipment cost.

Innovative Water Tank Design

The water tank is installed on the back of the body, to present a perfect outlook.

Sunny Series

Consecutive Drainage Function

Free of the hassle of pouring water away yourself.

5°C Low Temperature Operation

Operate finely at 5°C, making you enjoy fresh air under any environment.

High efficiency	Intelligent Defrosting	Comprehensive protection	Compact design	Easier maintainability	Inner groove copper	'Turbo' Button	Self-Diagnosis	Low voltage startup
Centralized control	Long-distance monitoring	Wide operation range	Auto Restart	Wide voltage range	Timer	Weekly timer	Lock	

- Power supply startup delay design, lower the unit starting current.
- High efficiency thanks to DC inverter compressor.
- The lowest noise thanks to advanced technology.
- The system could run stably under hard operation conditions.
- Connection pipe up to 145 meter length that convenient on installation.
- Stably heating under -15°C environment temperature. (only for the unit CUHD*C10)

* If Long-distance monitoring software Gree Eude mon 2009 is selected, the communication module ME30-00/E2 shall be selected also. The quantity of the module shall be confirm according to the quantity of outdoor units.

Light Commercial

U-Match

Super Inverter Series

It is a kind of split system that the outdoor unit can be freely connected to different types of indoor units according to various indoor decoration requirements.

- Double ambient temperature sensor design makes a precision temperature monitoring.
- low start-up current thanks to power delay control design
- Higher efficiency thanks to sine wave DC inverter compressor control.
- High reliability and easy maintenance thanks to one piece integrated PCB board.
- Stable cooling/heating under -15°C outdoor environment temperature (for the unit CUHD*C10).

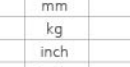

Indoor Unit

	Duct type	Cassette type	Floor ceiling type
• Drain pump fitted as optional with increased lift of 1100mm.	• Drain pump fitted as standard with increased lift of 1100mm.	• 3-D air flue design.	
• Fresh air inlet and air valve control function improve the indoor air quality.	• Special low noise fan design.	• Easy replacement of motor and fan blade thanks to clamp block propeller design.	
• Flexible air in/outlet and condensing water outlet direction according to different installation requirements.	• Different swing angle design for cooling and heating mode for better comfort.	• Different swing angle design for cooling and heating mode for better comfort.	
• Optimized air duct design improves the performance and lower the noise.

Light Commercial

U-Match

Fixed Frequency Series

It is a kind of split system that the outdoor unit can be freely connected to different types of indoor units according to various indoor decoration requirements.

- Double ambient temperature sensor design makes a precision temperature monitoring.
- With low ambient temperature cooling function, cooling normally in -7°C.
- The outdoor unit is universal, can be matched with floor standing, cassette, duct type indoor unit.

Indoor Unit

Duct type

- Fresh air inlet and air valve control function improve the indoor air quality.
- Flexible air in/outlet and condensing water outlet direction according to different installation requirements.
- Optimized air duct design improves the performance and lower the noise.

Cassette type

- Drain pump fitted as standard with increased lift of 1100mm.
- Special low noise fan design.
- Different swing angle design for cooling and heating mode for better comfort.
- All kinds of air freshener can be installed in the filter, such as catechin

Floor ceiling type

- 3-D air flue design.
- Easy replacement of motor and fan blade thanks to clamp block propeller design.
- Different swing angle design for cooling and heating mode for better comfort.

Item	Nominal operating condition (temperature)				Operation range (temperature) Outdoor condition DB (°C)
